Experience

Lead Product Designer Jan 2026 – Present
Construct Computer · construct.computer *Remote*

- Designed the cloud desktop where Construct's AI agents work, and a workflow editor that turns one good agent run into fixed steps that repeat at a fraction of the cost.
- Created the mascot, app icon, launch film and product motion; the Product Hunt launch finished **#1 Product of the Day** with 374 upvotes and 20K+ impressions on day one.
- Wrote 6,000+ lines of production frontend from my own high-fidelity designs and motion specs.

Product Design Engineer, Team Lead Apr 2026 – Oct 2026
Chandigarh University Lucknow · culucknow.com *Lucknow, India*

- Led design and development of the university website for 1M monthly visitors: 900+ pages from 19 layouts and 180+ reusable components.
- Won the chancellor's approval with a full homepage concept before the project began; delivered the design system, wireframes and architecture in a week, then led a team of 5.
- Kept layout in design tokens and shared components, so two management-led redesigns needed no rebuild; one went from request to staging in 2 days.
- Built a research explorer over 19K+ publications on a graph database and a placement dashboard; shipped the headless CMS, SEO and AWS setup by month five.
- Cut requests to 78 per page against 197–772 on peer university sites, with zero third-party requests and a 97 Lighthouse performance score.

Product Designer Apr 2025 – Jan 2026
Arweave India *Bengaluru, India*

- Designed and built the frontend of Glimpse, a semantic search engine for Arweave that won the $2,500 AI-Enhanced Applications track at ao's hackathon.
- Launched ArDacity UI, an on-chain component library (30+ components, 10+ AO blocks, 1.4K downloads), and PermaWay, which keeps HTML files on the Permaweb (100+ active users).
- Shipped 600+ commits across 10+ repositories for partners including SupAr Wallet, Bloom Protocol and ANON.

Freelance Brand and Product Designer 2023 – Present
Self-employed *Remote*

- Designed brands and product UI for AvenPing, Bhavrah, Polar and Waitlist Gallery; coded AvenPing's landing page.

Projects

Nepotism Network | *Figma, Adobe Illustrator* | ↗ Sep 2026

- Designed the brand and product for NepoNet, the warmest intro path to anyone on X: **#9 Product of the Day**.
- Designed the network map and outreach board; the graph mapped 1.2M accounts in its first five hours.

Theia | *Figma, React, TypeScript, Tailwind CSS, Motion* | ↗ Jul 2026

- Built a company brain end to end that answers across nine work tools and cites a source for every line.
- Designed a Greek-temple landing page with scroll-linked motion over a graph of 25,812 documents and 10,357 cited facts.

Achievements

- **HackFed 0.1:** 1st place in a national-level hackathon at Gautam Buddha University.
- **Hasbite Workshop:** mentored 50+ participants to 60+ deployments on the ICP mainnet.

Technical Skills

Engineering: TypeScript, React, Next.js, Node.js, Python (Django, Flask), PostgreSQL, Tailwind CSS, Three.js, Docker / Docker Compose, Git
Design: Figma (prototyping), Motion (Framer Motion), After Effects, Jitter, Illustrator, Inkscape, SVG animation
Systems and AI: Design Systems, Component Architecture, Retrieval-Augmented Generation (RAG), Agent Orchestration, Claude Code

Education

Chandigarh University Chandigarh, India
B.E. in Computer Science Engineering *Class of 2026, CGPA: 7.94/10*

D.A.V Public School Patna, India
Intermediate (Science) *93.6% in 12th grade*
